

# JERE NURMINEN

Software Development Student at [Haaga-Helia UAS](#)

Junior Web Developer at [McCann Helsinki](#)

*The latest version of this document is available in [this Github repository](#).*

## SKILLS

### Python

I have utilized Python to automate some of my workload with custom **scripts** and create web apps with **Flask** (ie. [a blog platform](#) and [a weather reporting app](#)). Currently falling in love with it.

### Javascript

I have done a few projects with **React** (used in both of the aforementioned projects, the former for its admin page and the latter for the whole front end). I'm also familiar with **Node**, having used it in [an older project](#). I am looking forward to using both in the future.

### Java

Java has been with me since the beginning of my studies, with a firm focus on it. I have created **Spring/Spring Boot** web apps and an **Android** e-learning app for a Finnish company as a team.

### PHP

There's no escaping PHP. I have used it for ~~complicated~~ custom **WordPress** templates and very simple CRUD apps.

### Linux

I have hosted many of my projects on my own **virtual server** and have spent long intensive hours configuring and troubleshooting it.

## STUDIES

### Haaga-Helia UAS

#### Software Development (01/2016 - )

Wide-ranging IT studies, specializing in software development. Projects in development of web and Android apps. Courses consisting of full-stack development, server administration and requirements analysis. Also extending my skills to 3D modeling/printing and basic knowledge of the business side of things. Expected graduation around the end of 2018.

### Laitilan Lukio

#### Matriculation Exam (08/2010 - 05/2013)

## **WORK EXPERIENCE**

### **McCann Helsinki**

#### **Junior Web Developer (04/2017 - )**

Creating WordPress sites (from scratch with custom themes), JavaScript-animated banners and coding HTML newsletters.

### **Opteam Oy**

#### **Customer Service (03/2015 - 04/2017)**

Varied customer service jobs in retail, mostly consisting of working as a cashier and as a meat-counter clerk.

### **National Defence University**

#### **Conscript Graphic Designer (03/2014 - 09/2014)**

Working as NDU's graphic designer. Designing and producing a multitude of both printed and digital materials for the school's events and website, in addition to doing the layout of two bigger releases.
